

Vansh Kumar Kesarwani

MERN Stack Developer | React.js | Node.js | Express.js | MongoDB

📞 +91-8756433837 | ✉ Email | 🔗 LinkedIn | 🐙 GitHub | 📍 Pratapgarh, Uttar Pradesh, India

Professional Summary

BCA graduate and MCA (Artificial Intelligence & Machine Learning) student with hands-on MERN Stack (MongoDB, Express.js, React.js, Node.js) development experience through a full-stack internship and 2 production-grade full-stack projects. Proficient in React.js, Node.js, Express.js, MongoDB, REST API development, JWT and Passport.js authentication, CRUD operations, Git/GitHub version control, and responsive UI development. Immediate joiner seeking MERN Stack Developer Internship or Entry-Level Full Stack Developer role.

Technical Skills

Frontend: React.js, Vite, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+), Responsive Web Design

Backend: Node.js, Express.js, REST API, JWT Authentication, Passport.js, CRUD Operations

Database: MongoDB, Mongoose, SQL

Tools & Platforms: Git, GitHub, Postman, VS Code, Cloudinary, Mapbox, Vercel

Programming Languages: JavaScript, Java

Internship Experience

Full Stack Developer Intern

September 2026 – Present

Vastora Tech Pvt. Ltd.

Noida, India (Onsite)

- Built full-stack web applications using React.js, Node.js, Express.js, and MongoDB, implementing REST APIs and CRUD operations.
- Worked on user authentication, API testing, debugging, database integration, and Git/GitHub version control following clean coding practices and industry-standard development workflows.

Projects

Velura – Luxury E-Commerce Platform

2025

Technologies: React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, JWT Authentication, Cloudinary

- Built a full-stack e-commerce web application enabling product browsing, search and filtering, cart and wishlist management, coupon application, order placement, and order tracking.
- Developed an admin dashboard with role-based access control (RBAC) for managing products, banners, users, and orders separately from standard user permissions.
- Implemented JWT-based authentication for secure login and Cloudinary integration for product image storage; architected React → Express.js → MongoDB request-response flow.

Wanderlust – Vacation Rental Platform

2024

Technologies: React.js, Vite, Node.js, Express.js, MongoDB, Mongoose, Passport.js, Cloudinary, Mapbox

- Built a full-stack vacation rental web application allowing users to search and filter properties, view detailed listings, and enabling registered hosts to list and manage their own properties.
- Implemented Passport.js session-based authentication and authorization, ensuring only property owners can edit or delete their listings and reviews.
- Integrated Mapbox geocoding API to convert host-entered addresses into geographic coordinates for interactive map display; used Cloudinary for image upload and storage.

Education

Master of Computer Applications (MCA) – Artificial Intelligence & Machine Learning

2025 – 2027

Amity University Online

CGPA: 8.82

Bachelor of Computer Applications (BCA)

2022 – 2025

Amity University, Lucknow, Uttar Pradesh

CGPA: 8.61

Certifications & Courses

- Full Stack Web Development – Apna College
- Data Structures & Algorithms in Java – Apna College
